

HSP Metric Test Points

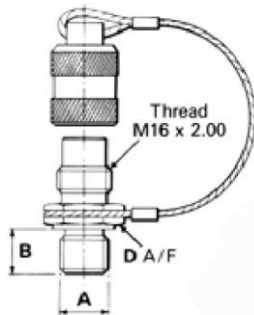

Conforms to DIN 2353 Standard

Working pressure up to 600 bar

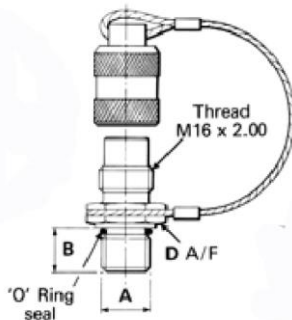

BSPP, BSPT, UNF, NPTF & METRIC ranges connect to system

Manufactured in passivated steel and stainless steel

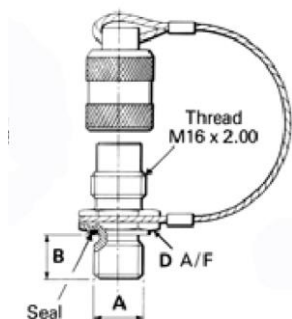

These plugs form part of the HSP DIN 2353 Test Equipment range which is designed to be complementary to and interchangeable with similar equipment from other manufacturers using DIN 2353 standards. Test points are installed into the hydraulic system hardware and can be used with DIN 2353 Pressure Test Probe Equipment. The equipment is used to obtain random pressure checks during service and fault finding. Probes may be connected and disconnected at full system pressure without fluid loss or ingress of dirt.
